BBC - Future - Will humans keep getting taller?

m.bbc.co.uk/future/story/20150513-will-humans-keep-getting-taller ▾

14 May 2015 - By the latter part of the 19th Century, though, the social upheaval had borne the fruit of improved agricultural production, running **water** and urban **sanitation**, as well ... Niger, one of the world's poorest and **least developed** nations, also has the world's highest total fertility, with women often bearing more than seven children.
