Education, Environmental

Reference library

Robert B. STEVENSON, Fiona MWANIKI, and Aravella ZACHARIOU
Berkshire Encyclopedia of Sustainability

Reference type: **Subject Reference** Subject: Science and technology, Social sciences
Current Version: 2016 Length: 3,393 words

...development to describe the link between the environment and development. The report argued the need for equity between and within generations, noting that development trends were leaving increasing numbers of people poor and vulnerable while degrading the natural environment. **Agenda 21** (the United Nations Action Plan that was a product of the 1992 Earth Summit in Rio de Janeiro, Brazil) called for a reorientation of EE education toward education for sustainable development or a sustainable future. This resonated with some policy makers and scholars who were...

Reference library

The Oxford Companion to Politics of the World (2 ed.)

Reference type: **Subject Reference** Subject: Social sciences, Politics
Current Version: 2004 Length: 5,196 words

...in Rio (also known as “The Earth Summit”), governments agreed on sustainable development as the leading political concept. They passed **Agenda 21**, an elaborate action plan to achieve sustainable development worldwide. Although a consensus definition of sustainable development was still lacking, the conference gained tremendous publicity and it had great influence on policy thinking. To monitor the implementation of **Agenda 21** and the related Rio Declaration, the UN created the Commission on Sustainable Development in 1993 . Sustainable development had by then...

Water (The Future of Sustainability)

Reference library

Sara G. BEAVIS
Berkshire Encyclopedia of Sustainability

Reference type: **Subject Reference** Subject: Science and technology, Social sciences
Current Version: 2016 Length: 6,553 words

...realistic time frames. These views were expressed at the same time that significant agendas were being developed on the international stage. At the Rio World Summit, in 1992 , values and directions for sustainable water resources management were outlined in Chapter 18 of **Agenda 21** (the 21 referring to the twenty-first century). At the United Nations Millennium Summit in 2000 , heads of governments resolved to embed a new ethic of stewardship (care of resources for future generations) and conservation within resource management and development. In...

...viewpoint of the victims, companies and government who did nothing to solve the issues are “wicked.” However, after the UN Conference of Environment and Development in Rio de Janeiro in 1992 , and the Great Hanshin-Awaji Earthquake in 1995 , conditions gradually changed. **Agenda 21**, which was accepted at the 1992 Rio conference, emphasized the role of all stakeholders, including citizens and civil society. In the aftermath of the 1995 earthquake, civil society (e.g., residents’ organizations and non-profit organizations) made significant contributions...

...was the largest gathering of heads of states in one place up until that time. It also sprouted an official nongovernmental gathering known as the Global Forum that nearly 20,000 people attended and in which 1600 organizations actively participated. One outcome from UNCED was **Agenda 21**, a comprehensive global plan for achieving sustainable development in the twenty-first century. It also produced a statement of principles, the Rio Declaration, and the architecture of “framework agreements” on biodiversity and climate; the latter would produced the Kyoto...
