

How UN members tried to extend the deadlines on adequate water and sanitation for all.

Dates on left: Deadlines.

Dates below: UN conference/summit agreements/reaffirmations.

The 2020 deadline set in 2011 is for "least developed countries".

Important: Nations seem in fact committed to 2020 and 2025, not 2030, because the previous agreements have never been ended.

Leaders in 2015 reaffirmed previous agreements, and said the LDC programme was "integral to the new Agenda". See also resolutions 72/223 and 72/231 of 2017.
